

Public Economics in Theory and Practice

Professor	Room	Phone	Office hour
Prof. Dr. Thiess Büttner Anne Maria Kesselring	LG 6.113 LG 6.115	5302-200 5302-203	by appointment Wednesday, 11 - 12

Contents:

The lecture provides an introduction in public economics at intermediate level. The course first derives the basic theoretical foundations for an optimal design of public policy. In the second step, the course discusses specific aspects of public policy, such as taxation and redistribution, social security, tax evasion, debt finance, interjurisdictional competition and fiscal federalism and explores practical problems.

Learning Objectives:

Students know how to characterize efficient public policies using microeconomic decision models. They can use this framework to study public policy in a rigorous and consistent general equilibrium context. Students are acquainted with important empirical approaches to evaluate public policies quantitatively. Moreover, they know about options, methods and limits to implement efficient public policy

Literature:

- Hindriks, J., and Myles, G., (2006), Intermediate Public Economics, MIT Press, Cambridge
Atkinson, A.B., Stiglitz, J. E., (1980), Lectures on Public Economics . MacGraw-Hill, New York

Further literature will be given in the course. Lecture notes are provided on StudOn.

Dates:

- Lecture: Monday 16:45 - 18:15, LG 5.152 (Start: 29.04.2018)
Tutorial: Tuesday 15:00 - 16:30, FG 2.024 (Start: 30.04.2019)
